PROFILE SUMMARY

Results driven Independent Security Researcher and Bug Bounty Hunter with a proven track record of identifying critical web application vulnerabilities. Actively participating in bug bounty programs since March 2025, and currently pursuing certifications to bridge the gap between independent research and professional offensive security consulting.

EXPERIENCE

Bug Bounty Hunter

Freelance | 2025 – Present

- Performed targeted reconnaissance using custom tooling and industry tools to identify injection points, exposed endpoints, and sensitive assets.
- Developed reproducible PoCs and clear remediation guidance for vendors, including context aware output encoding and allowlisting recommendations; retested and validated fixes.
- Documented findings in concise, report ready format suitable for disclosure programs and internal security teams; prioritized issues by impact and exploitability to aid vendor triage.
- Identified and responsibly disclosed multiple OWASP Top 10 vulnerabilities while maintaining strict adherence to RoE and ISO/IEC 29147 guidelines.

SELF DIRECTED EDUCATION

Developed practical expertise through hands on vulnerability research and bug bounty programs. Supplemented with structured training via PortSwigger Web Security Academy. Currently pursuing CompTIA Security+ and eJPT certifications.
